ACTUAL EXAMPLE OF A DETAILED PHOTO INTERPRETATION  
REPORT SHOWING MANHOOR SAVINGS

1. Drafting - 80 man hours
2. Composing and typing of 1st dummy - 32 man hours
3. Editing - 40 man hours
4. Final composing and production of mats - 24 man hours
5. Final proofing and correcting by editors - 8 man hours

TIME SAVED

1. Approximately 20 man hours could have been saved here by eliminating hand lettering.
2. Approximately 10 man hours saved because of the greater ease with which this machine can compose as compared to a regular typewriter.
3. Approximately 10 man hours saved because this machine will produce a dummy copy that is in a much more finalized form.
4. Approximately 12 hours saved by eliminating the second typing for margin justification completely and eliminating the re-typing of those portions of the original dummy not modified by the editor.
5. This entire step will be eliminated because the second typing is completely automatic.
